

# Jordan Rivera

☎ +1 555 010 2020 | ✉ jordan.rivera@example.com | 🌐 jordanrivera | 📍 Austin, TX

## SUMMARY

Full-stack engineer who ships products end-to-end, from schema design and APIs to frontend and deployment. Comfortable across the stack and biased toward shipping things that work.

## EXPERIENCE

|                                                                                                                                                                                                                                                                               |                                  |
