SUMMARY

Full-stack engineer who ships products end-to-end, from schema design and APIs to frontend and deployment. Comfortable across the stack and biased toward shipping things that work.

EXPERIENCE

Northwind Labs

Mar 2022 – Present

Software Engineer

Austin, TX

- Led the rebuild of the billing service, cutting invoice errors by 90%
- Designed and shipped a REST API consumed by 40+ internal services
- Mentored two junior engineers through their first production launches

Acme Web Co.

Jun 2020 – Mar 2022

Junior Developer

Remote

- Built customer-facing dashboards in React with 99.9% uptime
- Automated the release pipeline, taking deploys from hours to minutes

PROJECTS

Snip: Self-Hosted URL Shortener github.com/uAliAmer/Svelte-URL-Shortener

SvelteKit, Prisma, PostgreSQL, Redis

- URL shortener with click analytics, QR codes, tags, link expiry/limits, API keys, and admin panel
- One-command TLS via Caddy, or one-click Railway deploy

Hashban: Backendless Kanban Board github.com/uAliAmer/Hashban

TypeScript

- Single-page Kanban board whose entire state lives in the URL hash; sharing the link shares the board

EDUCATION

University of Texas at Austin

2016 – 2020

B.S. in Computer Science

Austin, TX

SKILLS

Technical : Go, TypeScript, React, PostgreSQL, Docker, REST APIs
